Introduction

1. In response to the note of the Secretary-General of UNCTAD dated 23 November 1973 requesting information regarding the operation of the schemes of generalized preferences introduced by preference-giving countries, the Government of Canada has provided information on imports of products covered by its scheme as well as on those of major products and their principal beneficiary suppliers for the period from 1985 to 1987. A summary of the information on imports from beneficiaries in these years is given in table 1 of the statistical annex, showing, for all and individual groups of beneficiaries (part A) as well as for each individual beneficiary (part B), total, MFN dutiable, covered and preferential imports of both agricultural and industrial products. The data on imports of major products and their principal beneficiary suppliers is summarized in tables 2, 3 and 4 of the annex.

Canadian imports from beneficiaries in 1985, 1986 and 1987

2. Canada imported from less than 100 beneficiaries in each of these years, of which 82 in both 1985 and 1986 and 70 in 1987 accounted for goods covered by its scheme of generalized preferences. Of these supplying beneficiaries, 69 in 1985, 67 in 1986 and 64 in 1987 availed themselves of the benefits of preferences. Canadian imports from beneficiaries in 1985 were valued at $6,757.2 million, of which $3,058 million, or 45.2 per cent, were MFN dutiable. Nearly 64 per cent ($1,949.3 million) of these dutiable imports were covered by the scheme, of which about 80 per cent ($1,554.7 million) actually received preferential treatment. In contrast, imports which actually benefited from GSP treatment in 1987 amounted to 68.6 per cent ($1,538.6 million) of those covered by the scheme ($2,244.1 million).

3. While the coverage ratio (share of covered imports in dutiable imports) and the rate of utilization of the scheme (ratio of preferential imports to covered imports) decreased steadily throughout the period under consideration, the decline in both ratios (7.2 per cent) for the period 1986-1987 was greater than that registered during the period 1985-1986 (3 per cent and 4 per cent, respectively). In addition to those that have not yet fulfilled the notification requirements under the scheme's rules of origin, a few countries, in particular Republic of Korea, Brazil, Malaysia, Singapore, Mexico, Bahamas, Venezuela, Barbados, Chile, Ecuador and El Salvador, had a major role in this decline in covered and preferential imports, which increased in the case of other beneficiary countries.

4. Seven major beneficiary suppliers (MS) accounted for more than three fourths of preferential imports from all beneficiaries in each year. Ranked by order of the relative importance of their imports receiving GSP treatment, these major beneficiaries were in:

1985: Republic of Korea, Hong Kong, Singapore, Brazil, Malaysia, China and Mexico;

1986: Republic of Korea, Hong Kong, Brazil, Singapore, China, Malaysia and Mexico;

1987: Republic of Korea, Hong Kong, Brazil, China, Singapore, Malaysia and Mexico.

Imports from least developed countries (LDCs)

5. The coverage ratio and the rate of utilization for the small number of LDCs (less than 10) supplying goods covered by the Canadian scheme decreased by 6.2 per cent and 19 per cent, respectively, from 1985 to 1986; by contrast they rose by 33 and 1.6 per cent, respectively, over the period 1986-1987. While the negative changes in these shares resulted from the failure of a number of LDCs to comply with the notification requirements under the scheme's rules of origin, two countries (Bangladesh and Nepal) accounted for most of these increases over the last period.

Major products imported and their principal beneficiary suppliers

6. As can be seen in tables 2, 3 and 4, preferential imports of these products had a predominantly negative effect on the overall rate of utilization of the scheme, partially reflecting these principal suppliers' unfavourable product composition in relation to the scheme's product coverage. These imports amounted to: $1,129 million in 1985, $1,079.2 million in 1986 and $996.6 million in 1987.

7. The principal beneficiary suppliers accounting for the bulk of imports of such products were in:

1985: Republic of Korea, Hong Kong, Brazil, Singapore, Mexico, China, Malaysia and Argentina;

1986: Republic of Korea, Hong Kong, Brazil, Singapore, Malaysia, Argentina, China and Mexico;

1987: Republic of Korea, Hong Kong, Brazil, China, Philippines, Singapore, Mexico, India and Thailand.
